

APPLYING THE THT TO PLANNING FOR WISCONSIN COMMUNITIES

WHAT YOU WILL NEED:

- 1. Handouts for assigned scenario**
- 2. THT Indicators and Strategies handouts and display boards**
- 3. Indicators and Data handout/worksheet**
- 4. Flip charts and markers**

TIME ALLOTMENT: 1 hour

PURPOSE OF EXERCISE:

- Understand how to access and use the Transportation and Health Tool (the “THT”) to review transportation and health indicators and strategies
- Provide transportation and health professionals with methods for using the THT to identify relevant transportation and health indicators, data sources and strategies to improve transportation and health outcomes
- Generate input that might be utilized for planning efforts underway by transportation and health stakeholders

DIRECTIONS:

You will follow the instructions of the lead facilitator for this exercise. You will work in groups on each of the following steps:

Step 1. Identify relevant THT indicators (write on large paper) – *15 minutes*

Step 2. Determine THT & secondary data sources using data matrix – *15 minutes*

Step 3. Select THT strategies – *15 minutes*

At the beginning of each step the lead facilitator will provide instructions for group work in the next step. Table facilitators will assist in breakout discussions and documentation.

RESULTS

Your group’s work on your assigned scenario to identify relevant THT indicators, data sources, and applicable THT strategies will be documented on provided maps and flipcharts. Following the exercise, each group will report out results to the full group.
