

ECWRPC Mini Conference Speaker Bios
Preparing Our Region for Connected and Autonomous Vehicles
April 26, 2019 - Hotel Retlaw, Fond du Lac, WI

Jonathan Riehl

Jon is a Transportation Systems Engineer in the Traffic Operations and Safety Lab at the University of Wisconsin-Madison and manages the Wisconsin Automated Vehicle Proving Grounds including the Park Street Connected Corridor and the CapEast Connector automated shuttle program. His work responsibilities include research in Transportation Systems Management and Operations (TSM&O), connected and automated vehicles, and geographic information systems (GIS), and teaching. Jon holds a PhD in Civil Engineering from Michigan Tech and has master's degrees in electrical engineering, geography, and business.

Robert Fischer

Rob is President of GTiMA and a Technology and Policy Advisor to Mandli Communications. Both GTiMA and Mandli work with national, international and regional authorities to advance smart city standards, policies, and best practices - especially as they relate to automated vehicles and the future of mobility. Rob is also an Associate Editor of the SAE International Journal of Connected and Autonomous Vehicles.

Jordan Skiff

Jordan has served as the Public Works Director for the City of Fond du Lac since 2011. The department includes divisions overseeing streets, water and wastewater utilities, transit, parks & forestry, engineering, stormwater management, solid waste disposal, fleet management, and the electrical department. He and his wife, Sheila, have eight sons, and celebrated their 25th anniversary in 2018!"
