QUESTIONS? CALL ERIN BONNIN AT (920) 751-4770
Come join us to explore the rapidly advancing technology that will ultimately change how transportation services are delivered in the future. Planning for the integration and use of connected and autonomous vehicles as well as related phenomena, such as electric and shared vehicles, will become increasingly important at all levels of government. What do you need to know at the municipal level about these forthcoming technologies? How will these technologies shape the future of mobility? What do you need to do to prepare? Our nationally renowned speakers will answer these questions and more to ensure that you start off on the right track.

Registration is only $20.00 per person and includes lunch! Register today as only 200 spaces are available for this unique event!
