# WICDI: Culvert Data Submission

## Oct 2019

### Purpose

The WI Coastal-Management Data Infrastructure (WICDI) project team is collecting data from community of practice (CoP) participants in order to begin the process of creating a universal schema. In addition to culvert inventories, we are collecting many other types of data - see examples below.

### Examples

1. Culvert and data inventories (GIS datasets, spreadsheets, etc.)
2. Culvert maintenance records and damage descriptions
3. Culvert data collection methods and protocols
4. Data dictionaries and metadata
5. Field manuals
6. Culvert/site photographs
7. Culvert risk factors (environmental conditions, geomorphology, watershed characteristics, etc.)

**If you have anything you'd like to contribute to this project (or you know someone who does!), please contact:**

Melanie Kohls  
Outreach Specialist  
State Cartographer's Office  
mkohls@wisc.edu  
(414)-721-8316

Hayden Elza  
Information Processing Consultant  
State Cartographer's Office  
elza@wisc.edu  
(608)-265-8106

**Thank you for your interest in WICDI and the Community of Practice!**
